# blue J TAX

Blue J Diagramming

Experience how effortless tax entity and relationship diagramming can be.

What is it?

Diagramming multiple entities and relationships doesn't have to be messy.

Blue J Diagramming is our re-imagining of what diagramming in the tax context should be, purpose-built for tax practitioners.

The tool will allow you to quickly and easily drop common entity shapes onto a canvas, draw connecting relationships between entities and capture key data related to the entities and relationships.

Why Blue J Diagramming?

Unlike general drawing tools, Blue J Diagramming is **purpose-built for tax practitioners**

Not a stand-alone drawing tool - complements suite of analysis tools

Captures data about the entities and the relationships between entities to provide further insight into how the legislation and regulations interplay with their structure

Intuitive UX-design to create the most seamless diagramming process

Provides a **faster diagramming process** through pre-built entity formatting

Access **templates built for tax practitioners, by tax practitioners**
